ABOUT HEADMASTA

I would call myself a talented, creative music producer and beatmaker. Starting out as a guitarist, I played in numerous luxembourgish bands and gained a lot of experience on various stages.

Later as a beat-maker I composed, arranged and recorded my first Hip-Hop songs on the drum machine "MPC". With the help of jazz, funk and soul records, I produced my own creations that quickly created enthusiasm in the national music scene. As DJ Headmasta I took part in the "Beatbattles" organized by Axwai Asbl and won most of them.

This success did not go unnoticed for a long time and I subsequently produced songs for national artists such as "Maka MC", "Edel Weis", "Corbi" by De Läb, etc. As a music producer, I recognize the wishes of the artists, recognize their strength and ensure a quick implementation.
